

Day 5

Documentation for Functional Testing Implementation

Morent

Testing API

Conduct functional testing to ensure core features work correctly, providing a seamless user experience. Use tools like Postman, Thunder Client, React Testing Library, and Cypress for validation.

Steps for Implementation

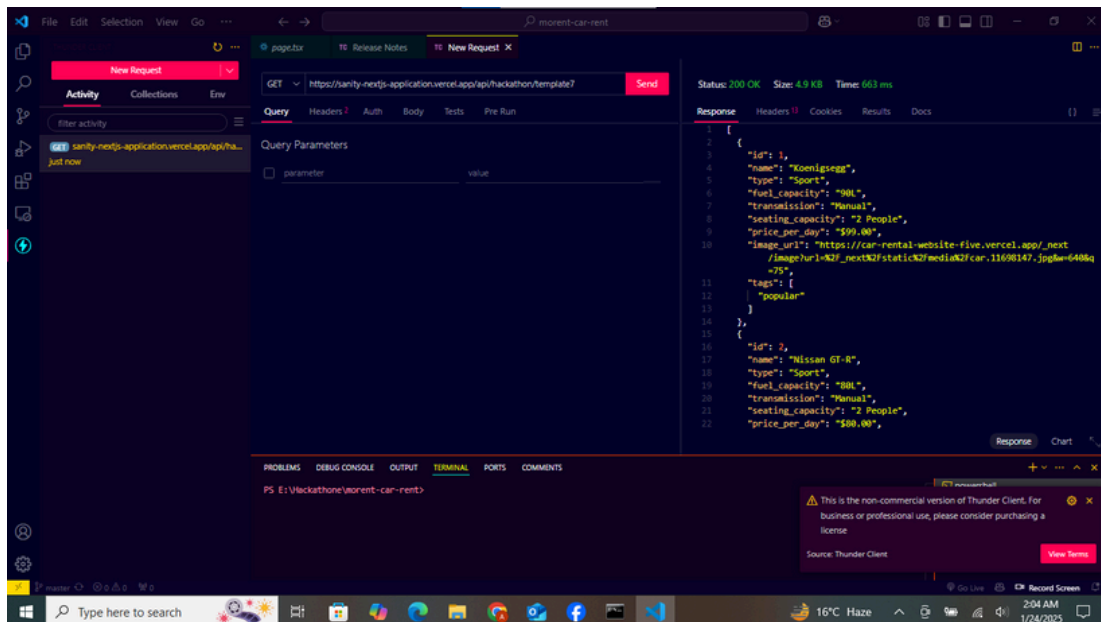

Functional Testing

2. Testing Tools:

Thunder Client: Lightweight API testing directly in VS Code.

Additional Notes

API testing completed using Thunder Client.
Screenshots will be shared for reference.

Performance Report

URL: [Car Details Page](#)

Captured on: January 23, 2025, 2:07 AM PST

Device: Emulated Desktop using Lighthouse 12.2.3

Page Type: Single page session, initial page load

Key Metrics:

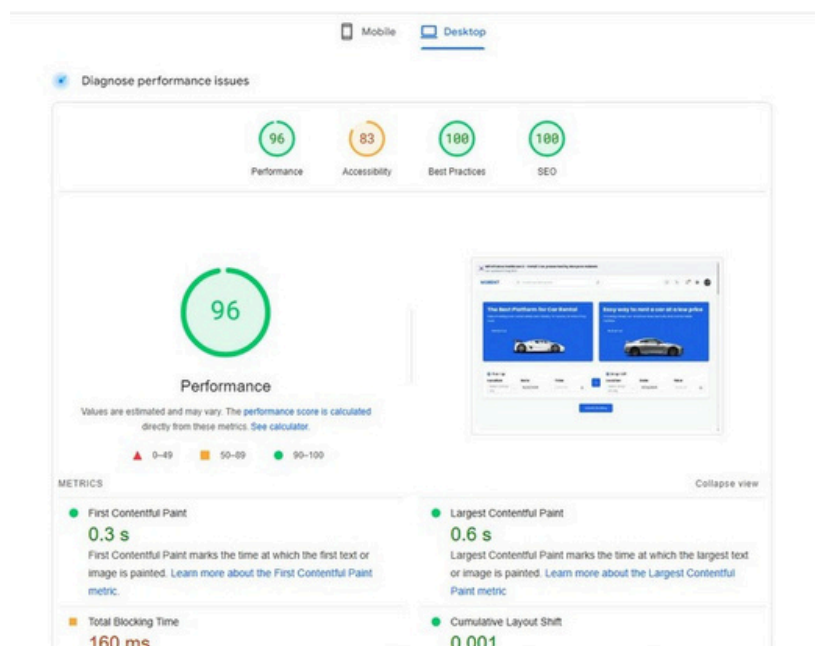

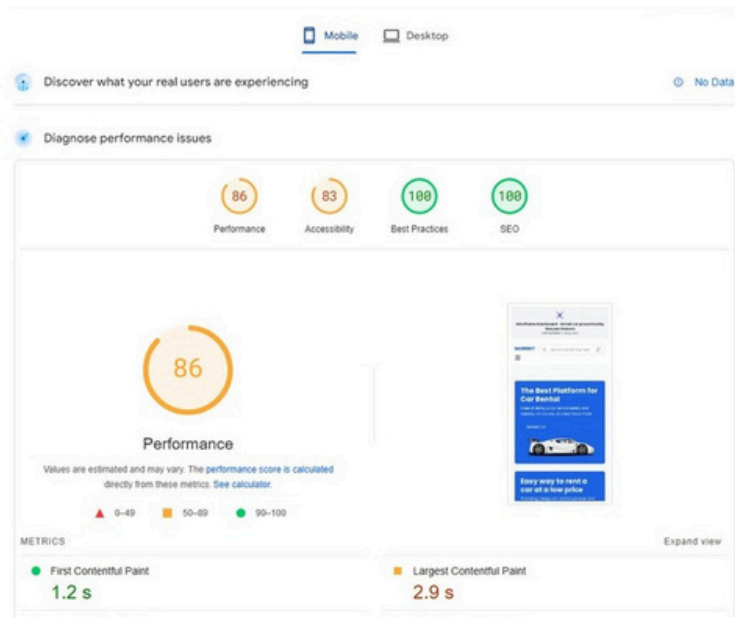

- **Performance:** 97 (Excellent)
- **Accessibility:** 92
- **Best Practices:** 100 (Excellent)
- **SEO:** 100 (Excellent)

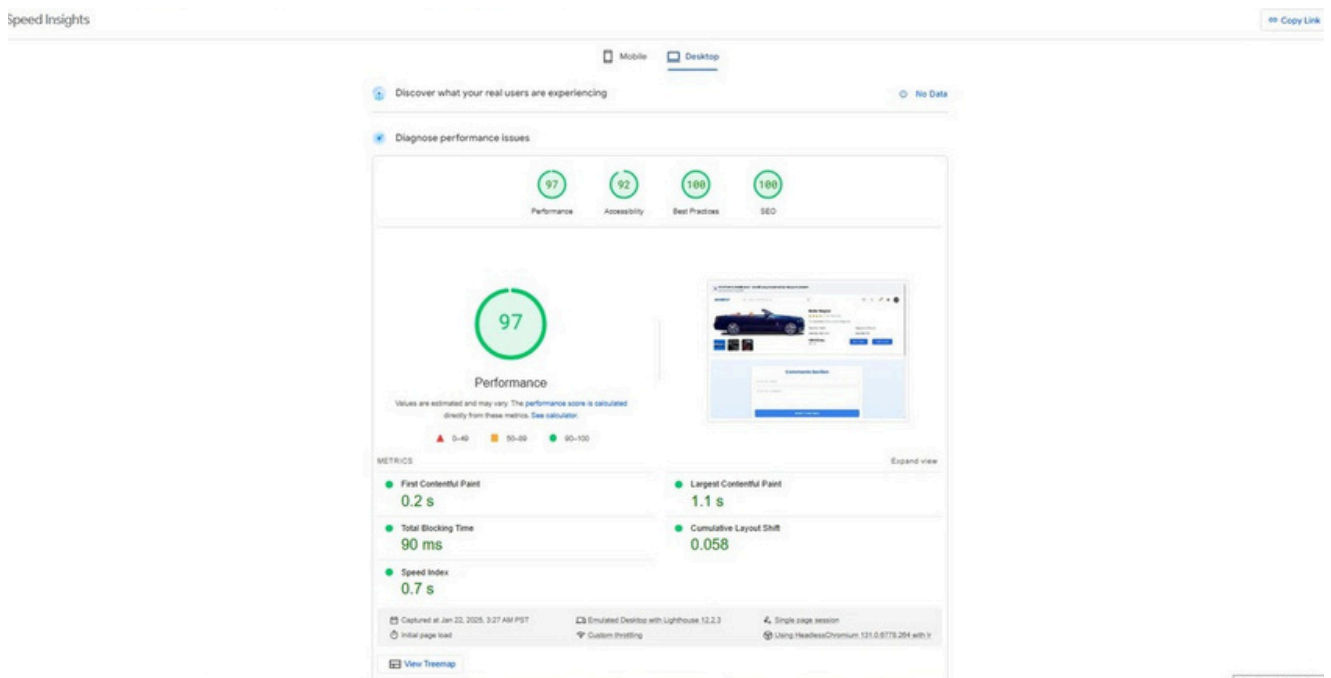

Load Metrics:

- **First Contentful Paint (FCP):** 0.2 seconds
- **Largest Contentful Paint (LCP):** 1.1 seconds
- **Total Blocking Time (TBT):** 90 ms
- **Cumulative Layout Shift (CLS):** 0.058
- **Speed Index (SI):** 0.7 seconds

Conclusion:

The performance of the page is strong with excellent scores for SEO, Best Practices, and Performance. However, there are some opportunities for improvement, particularly in reducing unused JavaScript, optimizing the loading of resources, and addressing layout shifts. Implementing these improvements can help achieve an even better user experience and faster load times.
